Terapia Urbana

**Living Wall at Quirón Sagrado
Corazón Hospital**
(Spain - Sevilla)

This living wall is developed on the ground floor on the left side of the extended floor, being visible from the main entrance hall to the clinic. It has dimensions of 17,00 m x 2,20 m high and is composed of more than 1400 selected plants and of more than 40 plant species

Indoor Living Wall at “Mamarracha, tapas y brasas” Bar *(Spain - Sevilla)*

Living wall with a Fytotextile® system where 475 plants have been used, including species such as *Maranta leuconera*, *Soleirolia*, *Asplenium nidus* or *Espatiphilum*. The plants have been organized in plastic and sinuous forms to reinforce the organic character of the whole, enhancing the natural feel of the living wall.

Living Wall in touristic apartments "El Armador Casa Palacio" *(Spain- Cádiz)*

The design of this living wall is inspired by sailor's motifs, waves, sea and sailboats, which are distributed among the 3 cloths, reinforcing their vertical connection in clear allusion to the name "El Armador" ("The Ship") and the thematization of the Hotel, which evokes the historic maritime tradition of Cadiz, in constant relation to the sea.

Living Wall in Bodegas Mora building rehabilitation *(Spain - Córdoba)*

This project is included in the integral rehabilitation of the old building of Bodegas Mora in Lucena, and adapted as a multipurpose center for citizen service. The landscape design proposed for this interior vertical garden is based on a Roman mosaic that recreates vine and grapes motifs, evoking the winery activity that historically housed the building.

Indoor Living Wall in Wellington Close

(United Kingdom - London)

Living wall inside a private dwelling in London, which was installed by our partner [Scotscape Ltd](#). Photos taken just after planting, where a high level of coverage is noticed from the very first moment, without having to wait long.

Living Wall in Levante Square *(Spain - Bilbao)*

A living wall installed on the exterior face of a fronton court wall in Levante Square. This huge vertical garden incorporates an area of 320 m² in the heart of the Deusto neighborhood in Bilbao. The landscape design incorporates local elements such as the trawlers, the cliffs of the Cantabrian coast and the local architecture, integrating nature and tradition.

Indoor Living Wall in central DGNB office (Germany - Stuttgart)

The installation of a small living wall of just 5.25 m², as a natural oasis in the center of the DGNB offices, uses the flexibility of the Fytotextile® system to adapt to a curved surface, and resolves the crossing through the interior circulations in a soft way. The design was inspired by one of the sections of Van Gogh's "Starry Night"

Indoor Living Wall InteriorPark Store *(Germany - Stuttgart)*

The peculiarity of this living wall, installed by our partner [Art Aqua](#) in the new shop of InteriorPark, is that the system is landscaped on both sides on a rigid panel suspended from the ceiling, which allows the garden to balance smoothly, reinforcing the lightness characteristic of the Fytotextile® system and acquiring a strong role in the interior of its new showroom.

**Living Wall in the Botanical
and Orchid Park of Estepona**
(Spain - Málaga)

Living wall composed of two surfaces made with Fytotextile® modules of 60 and 40 m², on both sides of a spectacular waterfall that presides over the central space of the only building created by the City of Estepona.

Living Wall in Wimbledon
(United Kingdom - London)

Living Wall in a Pharmacy (Spain - Seville)

Living wall is installed on the facade of a commercial building located in Seville. This living wall is organized in 4 sections with different orientations, adding a total area of 28.61 m²

**Outdoor Living wall in
Plaza de armas**
(Spain - Sevilla)

Living wall in emergency exits in public square. combination of design and selection of plants between the living wall and the green roof to have a harmonious vision. The project has 5 exits with different orientations and hours of sun very diverse, reason why the selected species have been studied to guarantee the life of the plants throughout the year

Vertical Garden in MARK & SPENCER store, Epping
(United Kingdom - London)

The SIMPLY FOOD shop in Epping, a small town to the east of Essex shire, which has been covered by the Fytotextile® outdoor system in its two facades with 47 m2 surface since November 2013

**Indoor Living Wall in
"Four Hands" Restaurant**
(Spain - Córdoba)

This living wall reinforces the bet of the establishments with a marked avant-garde character for the integration of natural elements in the interior of the restaurant. Some of the plant species selected for this project are: *Maranta leuconera*, *Codiaeum*, *Chamaedorea*, *Chlorophytum comossum*.

Living Wall in Showroom (Germany-Stuttgart)

Living Walls in the interior spaces have a great positive impact on people. Especially in work environments, the presence of plants and natural elements, produces a significant improvement in the performance and well-being of the workers.

Living Wall in Private Housing

(Spain - Sevilla)

In a privileged environment such as the emblematic Betis Street in Seville, an indoor living wall is located on the banks of the Guadalquivir River in a private property, installed by [García Gil Proyectos de Jardinería](#) with our Fytotextile® system.

Living Wall in Private Housing in La Zagaleta *(Spain - Málaga)*

This living wall was installed in a private housing in La Zagaleta neighborhood in 2 days, with a lost solution irrigation system, on a retaining wall surface. Some of the selected plant species for this project were: Fescue, Rosemary, Sedum lemmon ball and Ruselia.

**Living Wall on
Webber Street**
(England- Londres)

**Living Wall in the showroom
of Landscaping company
(Germany)**

This living wall has dimensions of 4,60 x 3,02 m. It is located in 1,5 m height, its presence is evident from almost all the points of the large office space, managing to create an authentic indoor landscape.

Living Wall in Albores
Restaurant
(Spain - Jerez)

Living Wall in Private Housing
(Morocco)

Living Wall in Bar Pelayo (Spain - Sevilla)

Bar Pelayo, un lugar pensado para la mezcla de razas, culturas y experiencias, ha sido inaugurado recientemente junto a la catedral de Sevilla. Su jardín vertical interior, instalado en la zona de paso entre dos salones principales del bar, se ha diseñado con una composición basada en elementos verticales, que incorpora más de 400 plantas de 10 especies diferentes.
